

NET ZERO STATEMENT

Our commitment

Damar Training has committed to achieving net zero emissions by 2038, in line with the Greater Manchester target. We measure our scope 1-3 emissions which, for 2022/23 were 82.4 metric tons of CO₂e, or 81kg of CO₂e per apprentice/year.

In the shorter term, we commit to reducing emissions by 15%, to 69kg of CO₂e per apprentice/year by 31st July 2026. We will do this through a range of measures including (1) prioritising carbon footprint when we procure; (2) encouraging colleagues to participate in our cycle to work scheme; and (3) encouraging colleagues to buy sustainable energy. We will also seek to have a wider impact through the curriculum and improving the carbon literacy of our apprentices.

Approved by the Board on: 2nd May 2024

Implementation lead: Jeanie Logan

Next review date: April 2025
